

[BOE330_16]: SAP BusinessObjects Business Intelligence Platform: Designing and Deploying a Solution

Length : 5 Days
Level : Details, Configuration & Transaction
Technology : SAP Business Objects Business Intelligence Platform 4.2
Delivery Method : Instructor-led (Classroom)

Audience Profile

- System Administrator
- System Architect

At Course Completion

- Participants will learn knowledge required to design and deploy an SAP Business Objects Business Intelligence platform.
- Participants will learn how to analyze and identify customer requirements in order to design a solution using the concepts of High Availability, Scalability, Sizing, Disaster Recovery, and Lifecycle Management.
- Participants will use a case study to design, build, and troubleshoot a system.
- Participants will produce a content management plan using advanced security and replication techniques.

Pre-Requisites

Essential

- BOE310
- BOE320

Course Outline

Module 1: Reviewing Architecture, Administration, and Security in SAP BusinessObjects BI Platform

Lessons

- Describing the BI Platform Architecture, System, and System Element
- Identifying Key Architecture Flows
- Reviewing SAP BusinessObjects BI Platform Security

Module 2: Identifying Requirements

Lessons

- Assessing your Organization's Environment
- Identifying Requirements using the Jade Publishing Case Study

Module 3: Planning a Deployment**Lessons**

- Identifying Factors to Consider when Deploying a BI Platform 4.2 System
- Identifying Factors that Influence the Deployment Process
- Identifying Factors to Consider when Installing a Deployment
- Identifying Factors to Consider when Configuring a Deployment

Module 4: Deployment Design and Sizing**Lessons**

- Designing an SAP Business Intelligence Deployment
- Designing a Scalable System
- Preparing a Sizing of a BI Platform Deployment

Module 5: Deployment and Configuration of an SAP Business Intelligence Platform 4.2 System**Lessons**

- Planning a Deployment Solution
- Configuring the Web Tier for High Availability
- Configuring the Management Tier for High Availability
- Configuring the Storage Tier for High Availability
- Configuring the Processing Tier for High Availability
- BI Platform Pattern Books and Best Practices for Deployment
- Server Groups

Module 6: Disaster Recovery in the SAP Business Intelligence Platform 4.2**Lessons**

- Planning for Disaster Recovery

Module 7: Content Management Planning**Lessons**

- Preparing to Manage Content
- Upgrading a Deployment
- Managing the Life Cycle of a Deployment
- Moving Objects from One Deployment to Another

Module 8: Deployment Administration**Lessons**

- Performing Advanced Troubleshooting of a BI Platform Deployment

Module 9: Deployment Replication**Lessons**

- Replicating a BI Platform Deployment
